Solution design for a bilingual voice and avatar proof of concept

Enterprise services / Solution design & proof-of-concept planning

Experience and business relevance

The documented experience is solution design for a bilingual voice and avatar proof of concept in an enterprise services setting. A conversational interface needs a defined audience, language scope, knowledge boundary, and evaluation plan before it moves into a pilot.

Documented contribution

Solution design; Bilingual voice interaction; Avatar proof-of-concept scope.

Business mandate	Information & systems	Delivery scope	Validation & ownership

Design questions for a comparable engagement

01 Which languages, scenarios, and user groups are in scope?

02 How should the interface handle unsupported requests?

03 What response quality and interaction criteria should the proof of concept test?

Proposed delivery path

Define the target conversations and language requirements. Map the voice, avatar, knowledge, and integration components. Agree the proof-of-concept boundaries and acceptance criteria. Prepare a pilot plan and technical dependencies.

A concrete starting point

One knowledge domain, an agreed user group, and a pilot assistant. Confirm the sponsor, selected systems and data, access boundaries, and acceptance measures before implementation.
